# Relevant Experience

# **User Experience Developer, Technekes**

2012 - Present | Charlotte, NC

- Create markup and styles for dynamic, web-based dashboards providing data visibility to client stakeholders
- Develop a collaborative rapid prototyping workflow using Git, Middleman and S3
- Design and develop dynamic, data-driven microsites in the context of Ruby on Rails
- Develop custom client web applications designed for use on an iPad
- Maintain web applications within .NET framework
- Develop data-driven email templates for multiple client marketing strategies across agriculture, healthcare and financial industries
- Developed an online work request portal to improve the email production process and clarify requirements and QA procedures among production team and stakeholders
- Ensure cross-client compatibility for all outgoing marketing emails
- Expand creative limits for email marketing within the company by developing advanced HTML templates while maintaining compatibility
- Collaborate with product development team to advance usability of email templating and sending

### **Owner/Developer, Ben Dalton Web Development**

2011 - Present | daltondevelopment.com

- Develop content and design for business websites using HTML, CSS and Javascript (jQuery)
- Coordinate web development with designer, gathering assets and slicing Photoshop comps
- Work with clients to build a vision for the website that both meets their needs and budget, then flesh out that vision
- Actively manage content for evolving business needs
- Incorporate forms to gather critical information from potential customers on behalf of clients
- Leverage PHP to send form information to clients
- Ensure cross-browser compatibility with visual presentation and interactive elements of websites

# **Project Manager, Christian World Adoption**

2007 - 2012 | Flat Rock, NC

- Managed content for three public websites and one internal website using HTML, CSS and content management systems
- Provided content strategy and direction for online manuals guiding clients through complex processes and improving the user experience

- Generated bulk emails for clients providing visual updates on the latest philanthropic opportunities
- Published compelling articles, photos and videos that fit within the larger communications strategy to the blog using WordPress and HTML
- Initiated and led a team approach to a necessary web content overhaul
- Designed and structured training presentations for clients using Microsoft PowerPoint and webinar software
- Analyzed communication options and coordinated a 60% reduction in the cost of international communications through a transition to VoIP
- Developed staff training on database management, social networking, VoIP communications and content management systems (Wordpress, Adobe Contribute and Dreamweaver)
- Manage multiple IT and construction projects within the US office and in our Ethiopian compound
- Created documentation processes for future projects undertaken in Ethiopia in order to maintain continuity through staff changes
- Promptly communicated progress and changes to project stakeholders
- Supervised implementation of company policies in foreign context
- Conducted internal ethics investigations and revised policies to improve safeguards effectively reducing company risk

### Multimedia Director/Worship Pastor, Northview Church

2005 - 2008 | Fletcher, NC
